SUMMARY

Computer Science student at Cavite State University - Imus Campus with a 1.29 GWA, seeking a software engineering internship. Built full-stack and backend applications using Node.js, Python, Java, PHP, MySQL, and SQLite. Strong interest in secure software development, with hands-on experience building authentication, user management, and database-driven systems.

EDUCATION

Bachelor of Science in Computer Science - Cavite State University - Imus Campus, Philippines

Expected Graduation: 2027 GWA: 1.29 (3rd Year, 1st Semester)

Relevant Coursework: Data Structures & Algorithms, Advanced Database Management Systems, Information Security, Software Engineering, Web Development, Game Development

PROJECTS

TrustFactor - Two-Factor Authentication & Account Management Platform (2026) | Node.js, Express, SQLite, HTML, CSS, JavaScript

- Built a full-stack authentication platform with TOTP and email-based 2FA, including user registration, login, recovery, and admin management workflows.
- Implemented security controls including bcrypt password hashing, AES-256-GCM secret encryption, SHA-256 session token hashing, rate limiting, account lockout, and secure cookie handling.
- Designed role-based admin features for monitoring user activity, sessions, locked accounts, and account management across multiple user roles.

SmartQueue - Web-Based Queue Management System with AI Chatbot (2025) | PHP, HTML, CSS, JavaScript, MySQL, Botpress, XAMPP

- Built a multi-role queue management system for students, staff, administrators, and display monitoring, supporting real-time reservation and status tracking.
- Integrated a Botpress chatbot to handle common student inquiries and reduce repetitive staff interactions.
- Developed backend and database logic for queue operations, user roles, and administrative management using PHP and MySQL.

RentaReady - Vehicle Rental Management System (2024) | Java Swing, MySQL, JDBC

- Built desktop rental system with admin dashboard supporting customer, vehicle, and booking CRUD using Java Swing, MySQL, and JDBC.
- Structured the application using a three-tier architecture to separate UI, business logic, and database operations for easier maintenance and scalability.

Patisserie POS System (2023) | Python, Tkinter, JSON, smtplib

- Developed POS system with Tkinter GUI featuring product inventory (JSON), shopping cart with real-time 12% VAT calculation, and automated email invoice generation via smtplib with purchase history logging
- Built admin features for managing product catalog, login access, and purchase history.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, PHP, C#, C++

Web & Backend: Node.js, Express, HTML, CSS, REST APIs

Databases: MySQL, SQLite

Security: bcrypt, AES-256-GCM, SHA-256, TOTP, Session Management, Rate Limiting

Tools: Git/GitHub, Postman, VS Code, XAMPP

Frameworks & Libraries: Tkinter, Java Swing, Botpress

Concepts: OOP, CRUD, Data Structures and Algorithms, SDLC

CERTIFICATIONS

Cisco Networking Academy - HTML, Python 1 & 2, JavaScript 1, C++ Essentials (DICT-ITU DTC Initiative)

AWS / Udacity & Accenture - AI Practitioner Challenge; Generative AI Foundations (AWS Academy)

ISC2 - Certified in Cybersecurity (CC) Training Completion
